

EDUCATIONAL MATERIALS AND RESOURCES

INSafe also develops and publishes materials and resources to the public, including brochures, annual reports, newsletters, presentations, training aids, and sample safety and health programs.

You may also subscribe to get the Indiana Department of Labor's in-house materials and publications, including the annual report **IN Review**, directly to your email!

Subscribe today and download available resources, publications, and posters at www.in.gov/dol/2384.htm.

"A **safe** company is a more organized, profitable company – reducing injuries, lowering workers comp cost, and most importantly, taking care of the workers. We see **INSafe** as a partner and a friend, not the 'scary' OSHA that people sometimes associate with workplace safety and health compliance."

Dan Fay, Environmental, Health & Safety Director
Oscar Winski Metals Recycling | Lafayette, Indiana

INSHARP CERTIFICATION

Small Hoosier workplaces that operate exemplary workplace safety and health management systems may be eligible for participation in the **Indiana Safety and Health Achievement Recognition Program (INSHARP)**.

INSHARP participants are recognized as industry leaders in workplace safety and health, and also receive an exemption from programmed IOSHA inspections for one to three years.

For more information about INSHARP, visit www.in.gov/dol/insharp.htm.

INSAFE

We're **YOUR PARTNER**
in Workplace Safety and Health

Our on-site occupational safety and health consultation program is
SIMPLE, CONFIDENTIAL, AND COMPLETELY FREE.

In 2016, the Indiana Occupational Safety and Health Administration (IOSHA) **cited 2,000 violations** at Hoosier businesses that added up to nearly **\$2.64 million in initial penalties.**

INSafe does not impose fines. Instead, we offer programs and services that educate and assist employers in achieving occupational safety and health compliance.

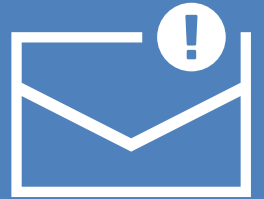

In 2016, INSafe worked with Hoosier employers and employees to identify and help correct **1,144 serious hazards.**

Schedule your **free consultation** for your opportunity to prevent injuries, prevent lost time, and prevent IOSHA penalties!
www.in.gov/dol/insafeconsultation.

REQUEST

Our assigned INSafe team member begins the process by working directly with the employer, gaining an understanding of the facility or worksite's safety and health programs, and defining the needs and goals for the site. Preparation and scope-of-visit are the first steps of the INSafe process.

ON-SITE VISIT

On the scheduled date, your assigned INSafe team member arrives to walk the workplace alongside the employer or safety director. During the visit, we identify deficiencies or gaps in existing safety and health programs, locate and help correct hazards, and perform a total assessment of the site's necessary steps for compliance.

CLOSING

Upon completing the on-site visit, INSafe then provides employers with a full technical report, findings (which include any identified hazards if applicable and recommendations for correction), best practices, sample programs, and potential resources or information to help structure preventative and proactive workplace safety and health programs.
